With a creative and engaging mix of coaching practice, management theories, case studies and personal story-telling, this book helps readers to identify both their own compass – which relates to integrity, passion and internal value systems – and radar – which helps them to understand organizational complexity and read workplace dynamics and situations. The Compass and the Radar is founded on a series of searching questions that will enable anyone to find their compass and radar to achieve personal success: · How can I find out what my real strengths and talents are? · Do I love what I do? · How can I find a job with a company that truly reflects my values? · What is the price I am willing to pay for a meaningful and rewarding career? · How should I define a successful career?
