Written for business leaders and consultants who are trying to solve significant problems and create measurable value. Readers can view the templates used in consulting studies and how they are used. All the foundational strategy and business analyses tools are taught along with the soft skills and practical tools to solve any business problem. This is the only book of its kind walking the reader step-by-step through a complete consulting study. This book follows an engagement team as they assist a large company in diagnosing and fixing deep and persistent organizational issues over an 8-week assignment. Readers will learn how they successfully navigate a challenging client environment, frame the problem and limit the scope, develop hypotheses, build the analyses and provide the final recommendations. We have placed the explanation of management consulting techniques within a lively and engaging storyline, which allows the reader to truly understand the challenges faced on consulting engagements, connect with the characters, and understand both how and why they debated elements of the study. It is written so that the reader may follow, understand, and replicate a strategic engagement using the same techniques used by the leading firms, such as McKinsey, Bain, and BCG. To make the story realistic and useful, we have worked with one client engagement throughout the book. Using different examples and different clients to explain concepts would have made it difficult for readers to see the data linkages and development of the final recommendations. The client and engagement are fictitious. The data presented are also fictitious, but they are based on actual consulting engagements and the experiences of the author and the contributing McKinsey, BCG, et. al. partners at FIRMSconsulting.com & StrategyTraining.com. Consulting in Complex and Changing Times Organizations face challenges today that are too messy and complicated for consultants to simply play doctor: run a few tests, offer a neat diagnosis of the “ problem, ” and recommend a solution. Edgar Schein argues that consultants have to jettison the old idea of professional distance and work with their clients in a more personal way, emphasizing authentic openness, curiosity, and humility. Schein draws deeply on his own decades of experience, offering over two dozen case studies that illuminate each stage of this humble consulting process. Just as he did with Process Consultation nearly fifty years ago, Schein has once again revolutionized the field, enabling consultants to be more genuinely helpful and vastly more effective.

Goes beyond the spirit of empowerment to discuss the benefits of companies that offer equity and partnership for its employees at all levels, discussing what stewardship means, management accountability, quality control, and human resources. Reprint. 30,000 first printing. \$40,000 ad/promo. IP.

The traditional training process confuses training activity with performance improvement by focusing on employees' learning needs, rather than on their performance needs. Traditional programs focus on developing excellent learning experiences, while failing to ensure that the newly acquired skills are transferred to the job. Thus, to be effective, training professionals must become "performance consultants," shifting their focus from training delivery to the performance of the company and its individual contributors. Dana & Jim Robinson describe an approach suitable for use in any organizational setting or industry and with any content area. Dozens of useful tools, illustrative exercises, and a case study that threads through the book show how the techniques described are applied in an organizational setting.

Most of our communities are fragmented and at odds within themselves. Businesses, social services, education, and health care each live within their own worlds. The same is true of individual citizens, who long for connection but end up marginalized, their gifts overlooked, their potential contributions lost. What keeps this from changing is that we are trapped in an old and tired conversation about who we are. If this narrative does not shift, we will never truly create a common future and work toward it together. What Peter Block provides in this inspiring new book is an exploration of the exact way community can emerge from fragmentation. How is community built? How does the transformation occur? What fundamental shifts are involved? What can individuals and formal leaders do to create a place they want to inhabit? We know what healthy communities look like—there are many success stories out there. The challenge is how to create one in our own place. Block helps us see how we can change the existing context of community from one of deficiencies, interests, and entitlement to one of possibility, generosity, and gifts. Questions are more important than answers in this effort, which means leadership is not a matter of style or vision but is about getting the right people together in the right way: convening is a more critical skill than commanding. As he explores the nature of community and the dynamics of transformation, Block outlines six kinds of conversation that will create communal accountability and commitment and describes how we can design physical spaces and structures that will themselves foster a sense of belonging. In *Community*, Peter Block explores a way of thinking about our places that creates an opening for authentic communities to exist and details what each of us can do to make that happen.
