Read Book Mcqs Midwifery Obstetrical Nursing Jyoti

This book Essentials of Midwifery and obstetrical nursing is based on course and curricula of nursing students. It provides nursing students with the knowledge and skill they need to become competent, think critically and possess the sensitivity to become caring nurses. In this changing world on health care delivery system, there is a need to develop professional competencies in nurses and midwives. In view of these changes this title is organized into 14 chapters. Ideally the text is flowed sequentially, but every effort has been made to respect the differing needs of diverse curricula and students. Thus each chapter stands on its own merit and may be read independently of others. Every attempt has been made to maintain simplicity and lucidity of language and style, so that student can grasp the subjects very clear and completely.

Internet of Things is a textbook designed for students of computer science, information technology and electronics & communication engineering to understand the interconnection and integration of the physical world with the cyber space and begin designing and developing simple IoT devices. Divided in to five parts, the book in nineteen chapters takes the reader through the foundations of the subject before moving onto discussing the essential components of an IoT system, including the sensor and actuators, open hardware, middleware, and software platforms with sound illustrations for better understanding. It also dedicates a complete module comprising four chapters on IoT and its relevance to Big Data. The last two parts of the book focuses on data management and use cases finally ending with the chapter on futuristic outlook of this technology.

Read Book Mcqs Midwifery Obstetrical Nursing Jyoti

Data is fundamental to the modern world. From economic development, to healthcare, to education and public policy, we rely on numbers to allocate resources and make crucial decisions. But because so much data fails to take into account gender, because it treats men as the default and women as atypical, bias and discrimination are baked into our systems. And women pay tremendous costs for this bias, in time, money, and often with their lives. Celebrated feminist advocate Caroline Criado Perez investigates shocking root cause of gender inequality and research in *Invisible Women*, diving into women's lives at home, the workplace, the public square, the doctor's office, and more. Built on hundreds of studies in the US, the UK, and around the world, and written with energy, wit, and sparkling intelligence, this is a groundbreaking, unforgettable exposé that will change the way you look at the world.

Both the subjects (Sociology and Psychology) have been extensively covered as per the GNM Syllabus.
