Guide Iso Tc 211

This guidance is in addition to the procedures for technical work and the methodology for the development of International Standards established by the ISO/IEC Directives. This Guide makes a distinction between three different types of management system standard (MSS), as follows. Type A:

Access Free Standards Guide Iso Tc 211

management system requirements standards, both generic and sector-specific. Type B: management system guidelines standards, both generic and sector-specific. Type C: management system related standards.
